

PHASEBOOK

Quarterly Newsletter: Winter 2021

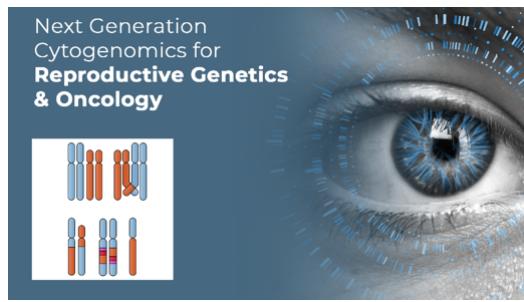

Wrapping up 2021 and looking forward to 2022

So much happened last year! We released new products, expanded our applications, and passed 100 scientific papers published with our tools. Read more about the highlights of 2021 in our [recent blog](#).

NEW PRODUCT—OncoTerra™ launch expands opportunities in precision oncology.

Phase Genomics is kicking off 2022 with an expansion into the clinical research and oncology space, featuring ultra-long-range sequencing technology that opens doors into precision oncology. New platform, [launched January 5, 2022](#), unlocks the wealth of genomic structure information contained in FFPE samples, in a cost-effective and scalable NGS-based assay.

Webinar on new applications

Watch our webinar recap for insights into the expanding applications of ultra-long-range sequencing and an in-depth look at the technology behind our newest products.

Catch us at a Conference

We look forward to a return to conferences in the near future to celebrate the achievements researchers have been making around the globe. Phase Genomics is dedicated to making our presence at these events as safe as possible and will be adapting to the most recent guidelines and regulations to make these events possible.

[SMFM 42nd Annual Pregnancy Meeting – Orlando, FL \(Jan. 31 - Feb. 5\)](#)

[ASM Microbe – Washington, DC \(June 9-13\)](#)

[Precision Medicine World Conference – Silicon Valley, CA \(June 28-30\)](#)
